

CHAPTER IV

CONCLUSIONS AND SUGGESTIONS

This chapter focuses on the conclusion for the result of research and the suggestions for the further improvement.

A. *Conclusions*

Based on the data analysis and discussion in the previous chapter, the researcher concluded the result of this research show that studying listening through audio-visual is one of media that effective on investigating Indonesian English Foreign Language (EFL) learners' listening skill. It can be concluded as follows:

1. Applying audio-visual media to students' listening skill with the very high category with an average of 44.80 or 89.60%. It is mean that students give a positive response to the application of audio-visual media.
2. Students' test results on the listening test were 83% with good category.
3. The effect of audio-visual media can be seen from the table of Chi-Square Tests. Pearson Chi-Square section, the Asimp.sig (2-tailed) value of 0.040 is due to the Asimp.Sig (2-tailed) value of $0.040 > 0.05$, so it can be concluded that H_0 is accepted.

Therefore, there is an effect of the application of audio-visual learning media on the listening skill of class XI students at MAN 1 BONE.

B. Suggestions

In view of the fact that the audio-visual media has been proved is an significant method for students listening skill, the reseacher would like to give suggestions as follows:

1. For the teacher

The teacher could use audio-visual as references media in teaching listening skill. Therefore, the teacher were always stimulate the students' interest and motivate them in learning. It could help in teaching speaking, listening, phonetic phonology, or cross culture understanding. This method gave the students much variant subject video that can make the students interest.

2. For the students

Considering this method, the researcher suggests the students to learn English by using this method. It can be easier to learning English acquisition or learning English comprehension.

3. For the other researcher

It is suggested that other researcher may use the research results as information or a reference to conduct the research with the similar topic in the same design about the effectiveness of audio-visual with different subject.
