### **Publication Ethics and Publication Malpractice Statement**

**Review of International Geographical Education Online (RIGEO)** follows the standard for Ethics and Publication Malpractice set by the Committee on Publication Ethics ([COPE](#)) at the 2nd World Conference on Research Integrity, Singapore 2010. As a peer-reviewed and open access journal, one of our priorities is to ensure high standards of publishing. Publication ethics is an important concern and editors, peer-reviewers and authors should pay great attention to meet the ethical standards.

**Review of International Geographical Education Online (RIGEO)** takes its duties of guardianship over all the stages of publishing extremely seriously and recognizes its ethical and other responsibilities. RIGEO is committed to ensuring that advertising, reprint or other commercial revenue has no impact or influence on editorial decisions. In addition, the journal's Editorial Board will assist in communications with other journals and/or publishers where this is useful and necessary.

### **Publication decisions**

The Editor is responsible for deciding which of the articles submitted to the journal should be published. The publication decision should be guided by the policies of the journal's Editorial Board, and should be based exclusively on the academic merit and the decision of the reviewers. The Editor must stick to the contemporary regulations pertaining to libel, copyright infringement and plagiarism that are effective. He is entitled to carry out decision-making in consultation with reviewers or members of the editorial board. An editor must not use unpublished information in the editor's own research without the express written consent of the author. Editors should take reasonable responsive measures when ethical complaints have been presented concerning a submitted manuscript or published paper.
