**Title : CODE MIXING ANALYSIS IN SPEAKING ACTIVITIES: A
STUDY AT T.I.M.E CLUB OF HMPS TBI OF IAIN BONE**

This research aims to explore the types and levels of code-mixing the members do when speaking activity at T.I.M.E Club of HMPS TBI IAIN. Those ten members participated in this research. In taking the data, the researcher recorded the members speaking activity process and transcribed those recordings. In this research, the researcher explained all the data that have been found in speaking activity at T.I.M.E Club of HMPS TBI IAIN Bone by using Hoffman's theory about the types of code-mixing and Suwito's theory about the levels of code-mixing. The result of this research shows that intra-sentential of code-mixing is the type of code-mixing in the recording, and it is about 100%. In the bellow of intra-sentential of code-mixing, there is intra lexical code-mixing and involving a change of pronunciation, the Researcher did not find any data which are indicated as Intra lexical code-mixing involving a change of pronunciation. Then, the result in the levels of code-mixing on the recording. The data shows phrase level is the biggest level of code-mixing on the recording with the percentage of 50%, word level with a percentage of 28%, and clause level 22%.
