CHAPTER IV

CONCLUSION AND SUGGESTION

This chapter presents conclusion and suggestion concerning the result of the research. The conclusion is taken based on the research findings and the discussion that have been explained in chapter III. Following are the conclusion and the suggestion from the researcher.

A. *Conclusion*

The result of observation types of virtual learning, they have many applications the student can use to make virtual learning or do online learning. The result shows that the student can mix some application to support learning teaching process. Teacher used Zoom Cloud Meeting for explain the material; teacher used Google Classroom to gave the students assignment and to search the important information teacher and student communicated by WhatsApp. But teacher can use more than two applications if one of them does not support.

The result of impact of virtual learning, For the students that have desired to learn, their skill will improve, as like some of students have said their skill improve by virtual learning because they can learn anywhere even they can learn directly with best tutor in YouTube to practice their skill. For the teacher, he can improve their material to be interest. And they will be easy to share material. For the students do not know to take the chance or lazy and their mindset only want to be bribed, without knowing how to get knowledge by themselves, they will be life in behind. For the student or teacher will be

difficult to do virtual learning if nothing system and data. If the students or teacher have unexpected situation, it will disturb virtual learning process. Minus attention from students and Student are difficult to understand. Minus relation (interaction) between teacher and student so that they are difficult to be controlled.

B. *Suggestion*

Considered the conclusions above some suggestion are presented in this section. This research is expected to contribute practical and theoretical values in teaching English. The impact of using virtual learning in teaching English wants to provide some suggestions to teachers, students and other researchers.

1. For Teacher

The teacher must pay attention to the technical of teaching through virtual learning. Teacher must find some application that can make learning process goes well. so that they are accustomed to applying it in the school environment and in social life especially in this modern area.

2. For Student

Students must learn to try looking for some materials and self-taught. Student can make it himself get improvement in English. Do not depend only from teacher. It has limit.

3. For otheir Researcher

For other researchers, this research can be a reference to make other research related to this research. Try to make awareness that if we can

mastery digital as like virtual learning or some application that support education.
