

CHAPTER IV CONCLUSION AND SUGGESTION

A. Conclusion

Based on the first research question, the final result of this research shows that most of the students still found problems related to the lack of vocabulary that students had, it made it difficult for students to form a phrase up to the sentence. In addition, the researcher also found that students still find it difficult to put ideas that cross their mind in the form of good and correct words it could be due to lack of reading so that there were still few references to the form of good paragraphs owned by students, there were also problems faced by students in arranging words into a sentence or even a paragraph, as well as still difficult to find ideas to start writing text.

While based on the second research question about the students' responses related to the use of poster comment method was effective the students in writing descriptive text. This result was evidenced by it found that out of 25 students, 100% or totally 25 students had claimed that using poster comment method was effective the students' writing descriptive text. It proved by the result of the frequency and percentage of students' score in questionnaire showed that 72% or 18 students got very high classification, 28% or 7 students got high score.

B. Suggestion

Based on the conclusion above, the researcher put some suggestion as follows:

1. For Teacher

The teacher should give the students more space to pay attention the material in the class with some considerations. Firstly, identify the character of students whether they are shy or confident enough. Secondly, the teacher should give more material which deals with the students' knowledge background. It aims to engage students' understanding in learning. The teacher could assign the students to explore more resource of English in internet.

2. For Students

Students should be aware that writing skills are skills that are not easy to master besides there must also be special mastery for vocabulary and grammar specifically so as to produce quality writing. One way that can be forged is by increasing the practice both in the learning process and at home.

The students are supposed to maximize the technology to make all simpler. They have the handphone, so they can use it to serve the material such as how to write a good descriptive text.

3. For Researcher

For the future to prospective researchers who want to do research on effective learning methods to improve writing skills, can make this research as a reference. in addition, researchers also hope that prospective researchers can produce better work in the future.
