

## CHAPTER IV

### CONCLUSION AND SUGGESTION

This chapter presents conclusion and suggestion regarding the research results. Conclusions are drawn based on the results of the research and discussion that have been described previously. Here are the conclusions and suggestions.

#### A. Conclusion

Based on the discussion, the researcher concludes the results of the writing test of class XI IPA 2 students at the eleventh grade of SMAN 6 Bone in writing essay that have been carried out and then analyzed based on the result of the test of the students' difficulties in writing essay by using think pair share strategy, the researcher found that the test result of writing essay by using think pair share strategy is two categories. The first category is good. There are four students who get good essay. They are AAA, EAA, ARV and FS. The second category is low. There are six students who get low. There are FF, CDO, AAR, ARO, ANAIS and ASR.

Based on the result of interview found in the students' difficulties in writing essay by using think pair share strategy. There are some the students who found it difficult to write essay because they are not fluent in English, there are a few words in English that they do not understand, and they do not know grammar.

## **B. Suggestion**

Based on the conclusions above, the researcher advise all readers and especially for teachers and students:

1. For teacher

Suggestions for teachers in considering suitable teaching methods in writing classes. By analyzing students' writing, the teacher should pay attention to some of the students' difficulties in writing essay to improve their writing skills in using think pair share strategy. This will make the students better understand how to write essay.

2. For student

The students should learn more about English. Students should improve their achievement, students should study more actively to increase their vocabulary. So, students can easily improve all their skills.

3. For researcher

Especially for future researchers, it is better to start now to learn about the research methodology and this research can be a reference to make other research related to this research.
